

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, July 23, 2015 - 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (160 new fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires: **	10
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Eight wildland fire suppression crews and eight fireline management personnel are assigned to support large fires in Alberta, Canada. Two wildland fire suppression crews and twenty-four fireline management personnel are assigned to support large fires in Saskatchewan, Canada. Additionally, several states are supporting Canada through interstate forest fire compacts.

**Alaska Area (PL 3)**

New fires:	3
New large incidents:	0
Uncontained large fires:	1
Type 2 IMTs committed:	1

**Tanana Area Fires (5 fires)**, Tanana Zone, BLM. IMT 2 (Grant). Started on native corporation land seven miles northeast of Tanana, AK. Timber. Moderate fire behavior with group torching, running and creeping. Numerous structures threatened.

**Rex Complex (2 fires)**, Fairbanks Area Forestry, DOF. Started on private land seven miles southeast of Clear, AK. Timber. Minimal fire behavior. Structures threatened. Last report unless significant activity occurs.

**Aggie Creek**, Fairbanks Area Forestry, DOF. Thirty miles northwest of Fairbanks, AK. Timber. Minimal fire behavior with smoldering. Numerous structures threatened.

**Ruby Area Fires (6 fires)**, Tanana Zone, BLM. Previously reported incident. Includes previously reported Middle Yukon fire. Twenty-six miles southeast of Ruby, AK. Timber. Minimal fire behavior with creeping and smoldering. Structures threatened. Increase in acreage due to more accurate mapping. Last report unless significant activity occurs.

**Aniak Complex (4 fires)**, Southwest Area Forestry, DOF. One mile east of Aniak, AK. Timber. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

**Tetlin Hills**, Tok Area Forestry, DOF. Eight miles southeast of Tok, AK. Timber. Minimal fire behavior with creeping and smoldering.

**Long Lake**, Tok Area Forestry, DOF. Started on BIA land two miles east of Northway, AK. Timber. Active fire behavior with running, torching and backing. Structures threatened. Last report unless significant activity occurs.

**Predictive Services Discussion:** Southwest flow aloft stretches from southern California through the southern Great Basin into the western slopes of the Rocky Mountains, sandwiched between a trough of low pressure in the northwest U.S. and an upper level ridge over the southern Plains. This will bring drier conditions to the southwest, with showers and thunderstorms in the northern Great Basin, northern Rockies, and southern Rockies. The Tennessee Valley to the mid-Atlantic will also see thunderstorms today associated with an upper level trough and surface front. In Alaska, there is a chance of showers and isolated thunderstorms in the south central region as a trough of low pressure moves east.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This report contains information derived from the National Fire and Aviation Management Web Applications (FAMWEB) system and other sources to provide relative information about emerging and ongoing incident activity. This information is considered operational in nature, is subject to change, and therefore may not match official year-to-date agency records.

## MANAGING VEHICLE TRAFFIC IN SMOKE

*Vehicles/Roads Category*

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
  - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
  - Notify local law enforcement units and highway departments of a potential problem.
  - Implement preplanned actions such as posting smoke warning signs.
  - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
